

Earthquakes *and* Structures, An International Journal

Volume 11, Number 2, August 2016

CONTENTS

- Stylios I. Pardalopoulos** (Cyprus, Greece),
Stavroula J. Pantazopoulou (Cyprus, Canada) and **Christos E. Ignatakis** (Greece)
Practical seismic assessment of unreinforced masonry historical buildings 195
- Alfredo Reyes-Salazar, Sonia E. Ruiz, Edén Bojórquez, Juan Bojórquez**
and **Mario D. Llanes-Tizoc** (Mexico)
Seismic response of complex 3D steel buildings with welded
and post-tensioned connections 217
- Jie Zhong, Xudong Zhi and Feng Fan** (China)
A dominant vibration mode-based scalar ground motion intensity measure
for single-layer reticulated domes 245
- Fabrizio Bianchini, A.B.M. Rafiqul Haque, Kasun Hewage**
and **M. Shahria Alam** (Canada)
Influence of green roofs on the seismic response of frame structures 265
- Xuan-Huy Nguyen and Huy Cuong Nguyen** (Vietnam)
Seismic behavior of non-seismically designed reinforced concrete frame structure 281
- Shuenn-Yih Chang** (Taiwan)
A virtual parameter to improve stability properties for an integration method 297
- Jiongfeng Liang, Deng Yu, Jianbao Wang and Pinghua Yi** (China)
Mechanical properties of concrete beams reinforced
with CFRP prestressed prisms under reverse cyclic loading 315
- Fabio Minghini, Elena Ongaretto, Veronica Ligabue, Marco Savoia**
and **Nerio Tullini** (Italy)
Observational failure analysis of precast buildings after the 2012 Emilia earthquakes 327
- Saeid Pourzeynali, Shide Salimi, Meysam Yousefifefat**
and **Houshyar Eimani Kalesar** (Iran)
Robust multi-objective optimization of STMD device to mitigate buildings vibrations 347
- Mustapha Remki, Fouad kehila, Hakim Bechtoula and Abdelkrim Bo** (Algeria)
Seismic vulnerability assessment of composite reinforced concrete-masonry building 371

Earthquakes and Structures

Vol. 11, No. 2 (2016)

Aims and Scope

The **Earthquakes and Structures**, An International Journal, focuses on the effects of earthquakes on civil engineering structures. The journal will serve as a powerful repository of technical information and will provide a high-impact publication platform for the global community of researchers in the traditional, as well as emerging, sub-disciplines of the broader earthquake engineering field. Specifically, some of the major topics covered by the Journal include:

- Characterization of strong ground motions, ■ Quantification of earthquake demand and structural capacity,
- Design of earthquake resistant structures and foundations, ■ Experimental and computational methods, ■ Seismic regulations and building codes, ■ Seismic hazard assessment, ■ Seismic risk mitigation, ■ Site effects and soil-structure interaction, ■ Assessment, repair and strengthening of existing structures, including historic structures and monuments, and ■ Emerging technologies including passive control technologies, structural monitoring systems, and cyberinfrastructure tools for seismic data management, experimental applications, early warning and response

Instructions to Authors**1. Submission of the paper**

Authors are asked to submit manuscripts in PDF (or Latex) format electronically through the Techno-Press Manuscript Upload System (TeMUS) (<http://www.techno-press.com/papers>). Exceptionally, the special issue papers may be directly submitted to the Guest Editor. If you have difficulties in using TeMUS, please contact us at [eas@techno-press.com]. On receiving submitted papers, the system will issue the paper ID and Password to the corresponding author which may be conveniently used to check the status of submitted papers.

2. Preparation of the manuscript

General : The manuscripts should be in English and typed with single column and single line spacing on single side of A4 paper. Submitted papers will be published in the category of regular technical paper only. The first page of an article should contain; (1) a title of paper which well reflects the contents of the paper (Arial, 16pt), (2) all the name(s) and affiliations(s) of authors(s) (Arial, 12pt), (3) an abstract of 100~250 words (Times New Roman, 11pt), (4) 5-10 keywords following the abstract, and (5) footnote (personal title and email address of the corresponding author (required) and other authors' (not mandatory)). The paper should be concluded by proper conclusions which reflect the findings in the paper. The normal length of the technical paper should be about 12-20 journal pages.

Please refer to Authors' Guide: http://www.techno-press.com/papers/Authors'_Guide_201512.pdf, and Template for the format of the paper: <http://www.techno-press.com/papers/Template.docx>

Tables and figures : Tables and figures should be consecutively numbered and have short titles. They should be referred to in the text as following examples (e.g., Fig. 1(a), Figs. 1 and 2, Figs. 1(a)-(d) / Table 1, Tables 1-2), etc. Tables should have borders (1/2pt plane line) with the captions right before the table. Figures should be properly located in the text as an editable image file (.jpg) with captions on the lower cell. All of the original figures and tables are required to be placed at the suitable location in the text.

Units and mathematical expressions : It is desirable that units of measurements and abbreviations should follow the System International (SI) except where the other unit system is more suitable. The numbers identifying the displayed mathematical expression should be placed in the parentheses and referred to in the text as following examples (e.g., Eq. (1), Eqs. (1)-(2)). Mathematical expressions must be inserted as an object (set as Microsoft Equations 3.0) for Microsoft Word 2007 and after versions. Image-copied text or equations are not acceptable unless they are editable. The raised and lowered fonts cannot be used for superscription and subscription.

References : A list of references which reflect the current state of technology in the field locates after conclusions of the paper. For details to prepare the list of references and cite them in the text, authors are advised to follow the introduction and the sample list in the Authors' Guide of the instruction.

3. Review

All the submitted papers that have passed the preliminary check by the editors will undergo a rigorous peer-review process to judge their significance and originality. Those papers positively recommended by at least two expert reviewers will be finally accepted for publication in the Techno-Press Journals.

4. Proofs

Proofs will be sent to the corresponding author to correct any typesetting errors. Alterations to the original manuscript will not be accepted at this stage. Proofs should be returned within 48 hours of receipt.

5. Copyright

Submission of an article to a Techno-Press Journal implies that it presents the original and unpublished work, and not under consideration for publication elsewhere. On acceptance of the submitted manuscript, it is implied that the copyright thereof is transferred to the Techno-Press. The Agreement of Authorship, Originality, and Copyright Transfer must be signed and submitted.

6. Ethics

Techno-Press applies research and publication ethics standards based on COPE's International Standards for Editors and Authors (<http://publicationethics.org/international-standards-editors-and-authors>). Violation of publication ethics will result in the activation of COPE flow chart. (<http://home.jeet.or.kr/Flowcharts.pdf>)

7. Publication Fee

Except for open access articles, there is no page charge or article processing fee for submission and publication in this journal.

Subscription information

The **Earthquakes and Structures, An International Journal** (abbr: Earthq. Struct. *Int. J.*) is published monthly on 25th day of every twelve months (Inagurated 2010). The basic subscription price (print+e) for 2016 including postage by surface mail is US\$492 for institutional subscription and US\$168 for personal sub. For delivery by air mail, add US\$64. Subscription orders and/or inquiries should be sent to Techno-Press, P.O. Box 33, Yuseong, Daejeon 64186, Korea. Tel: (+82-42) 828-7995, Fax: (+82-42) 828-7997, E-mail: subs@techno-press.com
